

R E M A R K S

A review of the filed response suggested that claim 24 had a 35 USC 112, second paragraph problem in the lack of a proper antecedent basis for the mentioned PBXs. The claim is corrected herein and, in order to fully clarify that the intended switch that has lines and trunks is a PBX, the claims are amended to change all references of "first switch" and "second switch" to "first PBX" and "second PBX" respectively.

As amended, it is believed that the claims are still patentable over the prior art and allowance of the claims is respectfully solicited.
